DRY STORAGE CONDITION

Under normal warehouse condition (3 deg. C, RH + 60% appr.). Nivera powders will remain stable in close cartons for 6 to 12 months. At high temperature the self life is reduced. Keep power carton away from oven and direct sunlight.

Applications

By electrostatic spray gun (60-96 kV Gun Voltage), fluidized bed and chamber coating.

Important

Antiques, metallic (smooth) requires clear over coating for better durability.

Use low gun voltage (20 to 40 kV) for Metallic powders.

For uniform pattern of Antiques, Textures, Structure and Hammertone, the oven temperature should be above 140 deg. C at the time of loading
